

Port Allegany Borough

Single Family Residential - Small Project Storm Water Management Application

Per Port Allegany Borough's Act 167 Storm Water Management Ordinance, an applicant is required to submit this Small Project application whenever proposing regulated activities involving the creation of new impervious surfaces. Impervious surfaces are areas that prevent the infiltration of water into the ground and shall include, but not be limited to: roofs, patios, garages, drive ways, parking lots, storage sheds and similar structures, and any new streets or sidewalks.

I. Property Information:

Property Owner:		Project Contact:	
Property Address:			
Contact Phone:		Contact Email:	

II. Current Project:

To Calculate Impervious Surfaces Please Complete This Table					
Surface Type	Length	X	Width	=	Proposed Impervious Area
<i>Building (area per downspout)</i>		X		=	
		X		=	
		X		=	
		X		=	
<i>Driveway</i>		X		=	
		X		=	
		X		=	
		X		=	
<i>Parking Areas</i>		X		=	
		X		=	
		X		=	
		X		=	
<i>Patios/Walks</i>		X		=	
		X		=	

		X		=	
		X		=	
Other		X		=	
		X		=	
		X		=	
Total Impervious Surface Area to be managed (sum of all					

III. Single Family Residential Requirements

Single family residents, even those exceeding 5,000 square feet of impervious surface, do not have to submit a Storm Water Management Site Plan, however they do have to comply with the minimum standards outlined in section 87-13E of the Borough Code. Questions pertaining to these standards are detailed below along with requirements for additional documentation which may be required.

1. Are you constructing a building or an addition to a building? Yes No
 - a. If the answer to question 1 is Yes, is the proposed building setback 75 feet or more from downstream property lines? (Borough Code 87-13E) Yes No
2. Are you constructing or extending a driveway? Yes No
 - a. If the answer to question 2 is Yes, does the proposed driveway runoff discharge onto pervious surface with a gravel strip or other spreading device? (Borough Code 87-13E) Yes No N/A
 - b. If the answer to question 2 is Yes, is the proposed paved surface larger than 1,000 square feet. Yes No
 - c. If the answer to question 2 is Yes, and the proposed paved surface is larger than 1,000 square feet, does it discharge at more than one point? Yes No N/A
 - d. If the answer to question 2 is Yes, does the length of the proposed pervious surface intended to handle runoff from a paved surface exceed the length of the paved surface flow? Yes No N/A
3. According to 87-12 G, do you propose to concentrate and discharge diffused flow onto adjacent property(ies)? Yes No (if Yes, you must provide documentation referenced below)
 - a. Section 87-12 G states that if diffused flow is proposed to be concentrated and discharged onto adjacent property, the applicant must document that adequate downstream conveyance facilities exist to safely transport the concentrated discharge, or otherwise prove that no erosion, sedimentation, flooding, or other harm will result from the concentrated discharge. Did you provide a copy of the required documentation with this application? Yes No N/A
 - b. Section 87-12 G (1) states that if diffused flow is proposed to be concentrated and discharged onto adjacent property, the applicant must provide an easement for the proposed concentrated flow across adjacent property(ies). Did you provide a copy of the required easement(s) with this application? Yes No N/A
4. Section 87-13 A requires that proposed projects must implement measures as necessary to: meet state water quality standards and requirements; protect health, safety and property; and meet special requirements for high quality (HQ) and exceptional value (EV) watersheds. Does your project implement these measures? Yes No
5. Section 87-13 B requires that proposed projects must utilize the following BMPs to the maximum extent practical. Which of the BMPs are you implementing in your project?

- a. Design around and limit disturbance of floodplains, wetlands, natural slopes over 15%, existing native vegetation, and other sensitive and special value features? Yes No N/A
 - b. Maintain riparian and forested buffers. Yes No N/A
 - c. Limit grading and maintain nonerosive flow conditions in natural flow paths. Yes No N/A
 - d. Maintain existing tree canopies near impervious areas. Yes No N/A
 - e. Minimize soil disturbance and reclaim disturbed areas with topsoil and vegetation. Yes No N/A
 - f. Direct runoff to pervious areas. Yes No N/A
6. According to section 87-13 C, does the proposed development/additional impervious surface adversely impact the following?
- a. Capacities of existing drainageways and storm sewer systems Yes No
 - b. Velocities and erosion Yes No
 - c. Quality of runoff if direct discharge is proposed Yes No N/A
 - d. Existing known problem areas Yes No N/A
 - e. Safe conveyance of the additional runoff Yes No
 - f. Downstream property owners Yes No

IV. Applicant Certification

Applicant or Property Owner certifies that the information provided above is true and accurate to the best of their knowledge. The applicant or property owner verifies that appropriate sections of Borough Code (87-12 G, 87-13 sections A, B, C and E) have been adequately addressed and acknowledges that submission of inaccurate information may result in a stop work order or permit revocation. Acknowledgement of such is by signature below.

I declare that I am the owner or the owner's legal representative. I further acknowledge that the information provided is accurate and employees of Port Allegany Borough and/or those designated by the Borough are granted access to the above described property for review and inspection as they deem necessary.
